

FIRST PROOF RUN FOR SYNETICS

This December 2022 proof run marks the real start, on 1 January 2023, of the new European cattle breeding cooperative SYNETICS, created by INNOVAL and MASTERRIND. Discover the SYNETICS genetic offer combining performance, sustainability and innovation with a diversity to fit each breeding system.

SYNETICS, a diverse and compelling genetic cooperative which contributes to feeding the global population and provides value by creating products and solutions, fulfilling a wide range of needs for sustainable cattle farming and climate-friendly, efficient and trouble-free cattle.

SYNETICS genetic line-up associates bulls created by EVOLUTION and MASTERRIND programs, designing a major genetic offer in Europe dedicated to support farmers in achieving their business goals, while enjoying work and life.
