

SYNETICS leader in Health and Genetic Progress !

SYNETICS brings the highest bulls' level to get efficient cows and anticipates tomorrow by providing essential new traits for farmer's challenges and society's requirements.

ANNUAL BASE CHANGE : HISTORICAL GENETIC PROGRESS IN HOLSTEIN BREED

The annual genetic base change shows the genetic progress made by the last generations and SYNETICS has largely contributed to this. This year the increase is historic with +8,4 ISU points !

Hoof Health now a National proof

Holstein has put his hoof on the accelerator !

5 years after Génosanté, a national Single Step proof enables greater genetic progress.

For more information, click [here](#)

RLI → SLI (Synthesis Infectious Lesions)

RLNI → SLM (Synthesis Mechanical Lesions)

NEW synthesis STPI (Synthesis Hoof Health)

New official ISU 2024 formula

To meet Holstein breeder's expectations !

- By integrating the new Hoof Health Synthesis to make life easier for breeders.
- By continuing to accelerate for greater progress in productivity and milking speed.
- All this, with particular emphasis on udder health, fertility and type.

For more information, click [here](#)

Retained Placenta and Metritis are now part of our Génosanté Synthesis

RPL → Retained Placenta

MET → Metritis

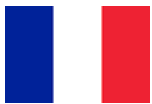

The potential of SYNETICS bulls brings results in herds :

The daughters of top 25% of bulls are twice as healthy as those of the bottom 25%
