

## A raise in our French ABONDANCE offer proofs

To show the quality of our offer!

**BREAKING NEWS ABONDANCE :** The main proof run in that breed with several new attractive proven bulls

- **Nesco** (Ionesco x Sherif) - A very complete bull, both in terms of production with positive rates and type, particularly in terms of width and depth of body. He also has a very good milking speed! A2A2 bull for use on cows.
- **Mush** (Dimitri x Piglou) A bull with good production and a milk rich in fat (TB 1.3%), he will provide udders of very good quality, very well attached, with good teat implantation and good size. Mush is also remarkable for his functional traits, with a positive combination of health, fertility and longevity. Very easy to calve, he can be used on heifers.
- **Mojito** (Denverse x Normand) A bull with high rates, he is remarkable for his morphology. His body is very well balanced between height, width and depth. The most notable feature is the quality of his udders: they are very well attached, with little volume and strong ligaments. The cows are dual purpose with a good muscularity index. A2A2 bull for use on cows.
- **Marwin** (Demon x Vortex) He has a very good dairy production and will bring size to his body and length and width to his pelvis. Functional udder with good teat length. Calm cows with very good milking speed. A1A2 and BB bull, for use on Cows
