

WHAT'S NEW AFTER THE AUGUST 2024 PROOF RUN?

The Fleckvieh breed (Dairy Simmental) is highly valued worldwide due to its outstanding suitability as a dual-purpose breed. In addition to the high milk yield and milk components, the sale of male calves for fattening is a significant income factor. Fleckvieh offers milk, beef and fitness on the highest level. The Fleckvieh breed adapts perfectly to all farming systems worldwide, like intensive, extensive, grazing and organic, which offers a great flexibility under various market conditions. Furthermore, Fleckvieh is excellently suited for crossbreeding with other bovine dairy breeds as well as with zebu breeds. The requirement for polled is also becoming increasingly important in the Fleckvieh breed. Almost 50% of all first inseminations in Germany are now done with semen from polled bulls.

SYNETICS provides its worldwide customers with a very high quality Fleckvieh range of bulls on GZW from our partner in southern Germany. Additional we also offer the only French Dairy Simmental / Fleckvieh bulls, from Simmental France, the unique Fleckvieh breed organization in France. No doubt that whatever the breeders are looking for in the breed, they can find it in our complete range of bulls.

PROVEN BULLS ON GERMAN BASE

If bulls remain later attractive following their high genomic breeding values, even among progeny-proven bulls, this creates confidence in the breeding program. That is why we are proud to be able to offer you 4 bulls that are among the top 6 progeny tested bulls:

#1 **Hashtag**, #2 **Zeiger**, #4 **Zubringer**, #6 **Haiti**.
