

## SYNETICS, Leading for Health & Genetic Progress!

**SYNETICS** brings the highest bulls' level to get most efficient cows, and also anticipates tomorrow by providing essential new traits for farmer's challenges and society's requirements

### « SINGLE STEP »: THE NEW « REFERENCE » METHOD

For this new december 2024 proof run, sire and daughter calving ease also benefit from the new « reference » genetic proof method: « single step », successfully deployed since 2022 for the other traits in dairy breeds in France. « Sire Calving Ease » (SCE) and « Daughter Calving Ease » (DCE) are now harmonized on the same scale than the others functionals traits, with the average of the reference population for mobil base at 0 and a genetic standard deviation of 1.

For the Normande breed, the recommended SCE threshold for use on heifers starts + 0,5.
