

WHAT'S NEW AFTER THE APRIL 2025 PROOF RUN?

After some delays in the proof run this winter, this new one is an opportunity to bring you the best of the Abondance and Tarentaise breeds, with no fewer than 10 new sires to choose from. These are proven sires who are in the spotlight in France. We continue to offer a range of genomic bulls available only in sexed form.

We are also delighted to announce that Abondance has launched a polled programme in 2024, by introgression. We will have to be patient, we will be able to discover the first polled bulls in 10 years' time.

In addition, the Abondance ISU will be renewed in June 2025; this new version gives a predominant place to functional criteria and rebalances the contents.

Critères	Nouvel ISU 2025	ISU 2008
MG (matière grasse)	15%	5%
MP (matière protéique)	17%	35%
TB (taux butyreux)	5%	2%
