

## WHAT'S NEW AFTER THE APRIL 2025 PROOF RUN?

April proof run 2025 is a win again for our Brown Swiss genetics, showing off proudly the current best proven bulls worldwide, **Optimal** and **Pactole**. After **O Malley**, we are delighted to see BGS program showing again such outstanding results, well deserved by the small but strong team always upfront to look for the most suitable sires to improve this fantastic breed.

In France, the annual base change showed the breed evolves positively in all criteria. The population is also **one of the few growing in France !**

The French Brown Swiss keeps adapting and displays now several polled bulls. A new one appears in this proof run, **Ultime P**, the first son of the sought-after Sting, along with 2 other new bulls: the new star **Varane**, the first LBB Ralice son, and **Uppercut**, a new PPR flagship.

Find out more below !
