

SUCCEEDING TOGETHER !

SYNETICS offers top-quality sires to create ever more efficient cows and anticipate the future with new traits that are essential for tomorrow's breeders and society.

April 2025 base change

Historical genetic progress in Holstein breed !

The annual base change shows the genetic progress made and SYNETICS has made a major contribution to this. This year the progress is historic with + 8.5 ISU points.

2025	ISU	Prot	Fat	Milk	Type	Udder	Body	F&L	MS	UDH	REPRO
	+8,5	+0,19	+0,23	+59	+0,25	+0,22	+0,1	+0,10	+0,01	+0,17	+0,12

FERTIMAX: ever more attractive bulls available

FERTIMAX is continuing its strong development on farms in France, Germany and abroad. **Recognized for improving the AI success rate by 8 points**, this revolutionary solution is now being used on a wider scale in the herd to boost reproduction, **reduce the number of return AIs by up to 25%** and **reduce culling**.

And to support this dynamic, **ever more attractive bulls are now available in FERTIMAX**, to meet all strategy needs: Usqvarna, Uztar P, Tarok P, Thorpe Rf, Saplomb, Shakaponk, ...

SYNETICS: results from the heart of the herd
